

1st Winter Symposium of "The Human Motion Project"

February 5th 2014

Hilton Munich City Hotel, Rosenheimer Straße 15, 81667 Munich

The vision of the Human Motion Project is to become a successful analogue of the Human Genome Project: improving human health by an open collaborative technology platform for the mobile medical monitoring of human motion. The basis is a growing "critical path toolbox" and a biomedical data warehouse for collecting, archiving, analysing, and disseminating human motion data including a library of validated algorithms.
